IF YOU HAVE SYMPTOMS, STAY HOME

*On Day 3 of symptoms you may take a home test. If negative, return when symptoms have resolved and are fever free for 24 hours (without the use of fever reducing medications).

***If test is positive:** Start isolation, count day 1 as the following day and stay home for 5 days. Wear a mask around others. On day 5, if you have no symptoms and are fever free for 24 hours, you may return. Wear a mask through day 10. **If on day 5, if you continue with symptoms, stay home until symptoms have re-solved and mask around others.**

COVID-19 EXPOSED

*Count day 1 as the following day, wear a mask for 5 days.

*On day 5, if showing symptoms- get tested. If negative, return when symptoms have resolved and are fever free for 24 hours (without the use of fever reducing medications).

WHAT CAN YOU DO TO SLOW THE SPREAD?

- Wash your hands: With soap and water, for 20 seconds each time you wash them.
- Clean “High Touch” Surfaces: Wipe down and sanitize shared spaces often.
- Give space and social distance.
